- **Real-time Unified dashboard with reports**— Helps you instantly assess your security, risk and compliance gaps, remediation reports with continuous monitoring.
- **Vendor Management**

### SC Magazine speaks... Review Rating of

Highest 5 star rating from SC Magazine, June 2014 for *Features, Performance, Documentation, Support, and Overall Rating!*  
 “A solid IT-GRC tool, it brings all the pieces together and simplifies the risk management process. The auto detection and import of assets from the SPM is a useful feature, but we really liked the ability to use scan results to automatically update or answer survey questions, thus reducing the amount of actual manual input required from a survey. By automatic mapping of scan results to compliance assessments, audit reviews become much easier with auto-assess and auto-review features” - [Peter Stephenson](#), SC Magazine, June 02, 2014
